Starting at 5pm

Come discuss
current research for
improving land and
water with us!

LINKING APPLIED KNOWLEDGE IN ENVIRONMENTAL SUSTAINABILITY
Inspiring Innovation. Learn more at www.uwstout.edu/lakes

For knowledge and dialogue!

We are hosting a public forum at The Raw Deal in Menomonie, including students and UW-Stout faculty from a variety of disciplines (anthropology, biology, psychology, engineering, and mathematics). We will present our summer 2022 research sponsored by the National Science Foundation and the Freshwater Collaborative of Wisconsin. Projects will focus on how we can fix our polluted watershed and the sustainable use of water in kidney bean production. This is a significant expansion of our research from previous summers that will facilitate data-driven discussions on a range of issues related to sustainability in our community. Please come and discuss this important topic with us!

Questions? Please contact Dr. Tina Lee at leetina@uwstout.edu
